

Full name: Kazem Abusitta
Country: Algeria
Address: Sidi Bel Abbès 22000
Email: kazem_zidane96@hotmail.com
Phone number: 00213781745699

Responsibilities:

Maintain the company's current applications or scripts.

Develop many different programming languages codes for different kinds of cross applications or scripts.

Pentest the companies current servers and applications and see if it is exploitable.

Debug applications to find vulnerabilities or weak points/errors.

Work with a team and together solve many problems.

Strengths:

Strong C++ programming and debugging knowledge.

Intermediate HTML/CSS/JavaScript, Java, Python and bash scripting/programming language knowledge.

Familiar with many linux terminal commands.

Intermediate knowledge in Networking and Cyber Security.

Operating systems familiar with: Windows and Linux specifically Kali Linux, Arch linux, Ubuntu.

Compilers or Text Editors familiar with: Visual Studio Community, Visual Studio Code, Pycharm, IntelliJ, Vim and Nano.

Can work extra hours and meet deadlines.

Traits and Characteristics:

Fun, mysterious and confident enough to interact and work with others as a team.

Education:

United Arab Emirates, GEMS Cambridge high school O levels

A in MATH and probably would have got an A* in ICT but chose Economics instead.

Overall:

3 years of C++/Java/Python and HTML/CSS/JAVASCRIPT "Web Dev" experience. I made a C++ single player text based graphics based game with Java.

I made 2 game botting scripts and many more small projects, you can find some of them on my github
<https://www.github.com/thendbend>.

I also made 3 websites, 2 of them are mine, which aren't hosted atm for you to see. But this one
<https://www.kalamatkat.com> I made for someone else and is hosted for you to see.

I'm also currently working on a confidential project for someone, which is a Network Cyber Cafe client/server system and been working on it for about 5 months.

I also have experience in Networking and Cyber Security, pentesting and CTFs.
